- Nach Überprüfung der Termine sind diese fest und müssen eingehalten werden (kein Tauschen möglich!)

- Veranstaltungsort/-zeit: **Webinar / Dienstags 08:15-09:00**
- Durchführung: kurze Vorstellung des Inhaltes des Papers (30 Minuten für Hintergrund, Material u. Methoden/Ergebnisse u. Diskussion) anschließend 15 Minuten für eine kurze Diskussion (Fragen, Kommentare etc.)
- Verantwortlicher JC: TÄ Vasiliki Katrinaki, [vasiliki.katrinaki@uni-leipzig.de](mailto:vasiliki.katrinaki@uni-leipzig.de)

<b>Datum</b>	<b>Vortragende/r</b>	<b>Paper / Thema</b>
23.01	P. Tönnies	Colloidal Iron Oxide Formulation for Equine Hoof Disinfection
30.01	A. Gierga	Long-term outcome of autologous fascia lata grafting with conjunctival flap overlay in horses with ulcerative keratitis and keratomalacia
06.02	V.Katrinaki	Desmopathy of the collateral ligaments of the equine distal interphalangeal joint - a prevalence in Poland between 2016-2019
13.02	A. Dörffel	Potassium penicillin and gentamicin pharmacokinetics in healthy conscious and anesthetized horses
20.02	S.Stöckle	Acute Kidney Injury and Renal Failure in Horses
27.02	L. Kummer	A new option for treating EMPF in horses (Equine Multinodular Equine Fibrosis) – report of four cases with a good outcome
05.03	S. Roth	Dangerous Behavior and Intractable Axial Skeletal Pain in Performance Horses: A Possible Role for Ganglioneuritis (14 Cases; 2014–2019)
12.03	H. Kölling	Venous blood gas parameters, electrolytes, glucose and lactate concentration in sick neonatal foals: Direct venipuncture versus push-pull technique
19.03	J. Büttner	Diagnosis and outcome following tenoscopic surgery of the digital flexor tendon sheath in German sports and pleasure horses
09.04	A.Pelli	The plantaroproximal cortex of the third metatarsal bone shows raised longitudinal ridges at the suspensory ligament enthesis in normal equine isolated limbs- a radiographic, computed tomography and MRI study
16.04	D. Scharner	Ex vivo evaluation of a percutaneous thread-transecting technique for desmotomy of normal palmar/plantar annular ligaments in horses
23.04	C. Arnold	Inhalation injury in 11 Thoroughbred racehorses: Clinical course on bronchoscopy, treatment and postinjury racing performance
30.04	L. Ganz Haseloff	Ancillary treatment to support pregnancy in cases of medical disease
07.05	L. Herschel	Transmural Ultrasonography in the Evaluation of Horse Hoof Internal Structures: Comparative Qualitative Findings—Part 1
14.05	K. Gerlach	Sinus-Pneumozele bei einem Pferd
21.05	T. Triebe	Clinical presentation and outcome of gastric impactions with or without concurrent intestinal lesions in horses
28.05	L. Schüttrumpf	Comparison of oral esomeprazole and oral omeprazole in the treatment of equine squamous gastric disease

04.06	S. Della Tommasa	Computer-assisted surgery for placing toggle constructs across the coxofemoral joints of small equids using a minimally invasive approach–A proof-of-concept cadaveric study
11.06	M. Ostmeier	A Computed Tomographic and Pathological Study of equine cheek teeth infundibulae extracted from asymptomatic horses. Part 1: Prevalence, type and location of the infundibular lesions on CT Imaging
18.06	A. Troillet	Selection signature analyses and genome-wide association reveal genomic hotspot regions that reflect differences between breeds of horse with contrasting risk of degenerative suspensory ligament desmitis
25.06	M. Ziegler	Evaluation of the effects of medium-term (57-day) omeprazole administration and of omeprazole discontinuation on serum gastrin and serum chromogranin A concentrations in the horse
02.07	S. Beetz	In vitro assessment of the motion of equine proximal sesamoid bones relative to the third metacarpal bone under physiologic midstance loads
09.07	K.Lohmann	Pathological bradyarrhythmia in horses
16.07	L. Burmeister	Risk of anesthesia-related complications in draft horses: a retrospective, single-center analysis
23.07	A. Murrone	The evaluation of the effect of probiotics on the healing of equine distal limb wounds
30.07	H. Engelmann	Intra-articular bone marrow mononuclear cell therapy improves lameness from naturally occurring equine osteoarthritis
06.08	L. Schröter	Equine odontoclastic tooth resorption and hypercementosis: Investigating individual incisor disease patterns using radiological classification
03.09	A. Schaller	Short-term effects of canagliflozin on glucose and insulin responses in insulin dysregulated horses: A randomized, placebo-controlled, double-blind, study
10.09	J. Daniel	Application of the Ridden Horse Pain Ethogram to 150 Horses with Musculoskeletal Pain before and after Diagnostic Anaesthesia
17.09	M. Furtmann	Standing equine cheek tooth extraction: A multivariate analysis of the effect of antibiotics on the risk of post-operative complications
24.09	J.Bankert	Preliminary Investigation of Side Effects of Polymyxin B Administration in Hospitalized Horses
